Experience

Game | Technical | Level Designer [Azur Games]
Full-time | Remote

April 2024 - November 2025

Project: SWAT Shooter Police Action FPS

Responsibilities:

- Full level creation cycle, from prototyping to finalization.
- Game mechanics prototyping.
- Lightmap baking and lighting setup.
- Asset integration into the game engine.
- Support for previously created levels.
- TTK and enemy balance on the level.
- Writing Pipeline documentation for level production.
- Writing documentation for: tools, level production pipeline, asset library, and metrics (environment, player, enemies).
- Formulating tasks for ART and DEV departments regarding the creation of assets, mechanics, and tools.
- Level optimization for mobile devices.
- Overhaul of the entire level based on received feedback.

Level Designer [Freelance]
Part-time | Remote

February 2022 - March 2024

Responsibilities:

- Designing and assembling locations in the editor.
- Establishing the graphic style.
- Metrics for Player/NPC/Level and writing relevant documentation, as well as compiling documentation related to tools and level design in general.
- Writing Test Tasks for creating art for levels and its subsequent integration.
- Developing criteria and requirements for level design.
- Adjusting lighting, composition, and other artistic techniques at the level.
- Working with Git, Plastic SCM.

Level Designer [Unannounced Project]
Freelance | Remote

March 2022 - September 2022

Description:

- Worked on an unannounced game - a 2D top-down adventure RPG.

About me

Level Designer with 4+ years of experience, specializing in the full cycle of level creation: From blockout and gameplay prototyping to final gameplay tuning and implementation of in-game events.

Worked on a mobile FPS with 1M+ downloads, focusing on Combat | Encounter Design, Level art, Flow and Gameplay pacing.

Besides level design, I have experience with programming and creating small tools and scripts. I am constantly looking for new opportunities to grow both professionally and beyond my current field.
