Experience

Level Designer | Game & Technical Design [Azur Games]
Full-time | Remote

April 2024 - November 2025

Project: SWAT Shooter Police Action FPS

Responsibilities:

Level Design:

- Full cycle of level creation, from blockout and initial gameplay logic to finalization.
- Level Design with a focus on Combat & Encounter Design: building combat spaces, encounter scenarios, and gameplay events.
- Lightmap baking and lighting setup.
- Development and maintenance of existing levels, including reworks and iterations based on feedback.
- Enemy balancing and gameplay event setup using visual scripting.
- Writing pipeline documentation for level production.

Game | Technical Design:

- TTK balancing.
- Prototyping gameplay mechanics.
- Setup and integration of assets into the game engine.
- Level optimization for mobile devices.
- Creating documentation for tools, asset libraries, and environment, player, and enemy metrics.
- Preparing technical specifications (T3) for the ART and DEV departments covering asset creation, gameplay mechanics, and tools.

Level Designer | Technical Designer [Freelance]
Part-time | Remote

February 2022 - March 2024

Responsibilities:

Level Design:

- Designing and creating levels in the editor.
- Defining the visual style and overall vision for the levels.
- Lighting setup and baking with Lightmap adjustment.
- Establishing criteria and requirements for Level Design during level creation.
- Development and maintenance of existing levels, including reworks and iterations based on feedback.

Technical Design:

- Writing and maintaining documentation for tools, player and NPC metrics, environment assets, as well as criteria and requirements for level assembly.
- Writing technical specifications for ART creation.
- Integration and setup of environment assets.
- Creation of level design tools, in collaboration with the DEV department.

Level Designer [Unannounced Project]
Full-time | Remote

March 2022 - September 2022

Description:

- Worked on an unannounced game - a 2D top-down adventure RPG.

About Me

Level Designer with 4 years of experience in game development.

Specializing in the full cycle of level creation: from blockout and gameplay prototyping to final visual polish and implementation of in-game events.

In addition to Level Design, I have hands on experience as a Game | Technical Designer: prototyping gameplay mechanics, balancing, visual scripting, working with metrics, technical documentation, and assigning tasks for ART/DEV departments.

Worked on a mobile FPS project with over 1M+ downloads.

Constantly seeking new areas for growth, both within the profession and beyond.
